ANIMAL DENTISTRY
REFERRAL SERVICES

OFFER MORE DENTISTRY TO YOUR PATIENTS

Better oral health will enhance patient health and also practice health.
Increase your bottom line and your dentistry CE opportunities!

YOUR OFFICE EARNS INCOME AND PROVIDES

- Bloodwork (CBC, Chem, Electrolytes within 60 days of procedure)
 - IV catheter/fluids; pre-medications, induction, and gas anesthesia
 - Monitoring to include heart rate, temperature, and blood pressure
 - Pain meds; antibiotics as needed
- (Extractions can be your service unless requested otherwise)

LET'S SAVE TEETH WHEN POSSIBLE

While dogs have 42 teeth and cats have 30 - let's work to save the 8-10 important strategic teeth in each patient. Schedule ADRS in your practice to offer advanced treatment such as root canal therapy, fracture repair, restorations, bone grafts, and special periodontal flap techniques where appropriate.

We can use your intraoral radiology equipment and high speed dental unit or bring in ours.
At least 3 of every 4 patients have a problem as noted on intraoral radiographs.
Radiographic dentistry imaging can be taught to your team. (CE fee applies)

DISCOLORED OR FRACTURED TEETH

The only appropriate choices are root canal therapy or extraction.
